

Quick Guide to VTMod

First Time you will see it in action will be when you choose the starting six girls to join the academy:
If you click on the “Overview for GirlName”, you will open up the girl review window, and you will see the first ‘Cherry’ set of icons.

The First Icon you will notice right away is the Cherry Info icon, dubbed Cherry Radar, which opens:

This shows her Cycles, Birth Control, pregnancy, sexual states and items currently active on her. All the ? marks your seeing, is stuff you don't know about her yet.

Next page will break down the Cherry window and explain it more.

Cherry Window

The icons are easy to remember when you get used to them:

	Cherry Radar	The Cherry Radar button, opens the Cherry Radar
	Unknown Birth Control	? means you don't know if she is on any kind of birth control.
	Not on Birth Control	She is NOT on birth control. Open flower.
	Birth Control	She is on birth control. Closed flower.
	High Fertile state and not on BC	If you see a bee, she is in a high fertility window and most likely not on birth control. Pollination time.
	Sex status	Unknown sex status, meaning she hasn't had sex with you today. Right now it could be either unknown or Virgin. Virgin means she never had sex before.
	Had Sex Today	You had sex with her already today.
	Pregnant	She is pregnant, and most likely your fault.
	Unknown condom needs	? means you don't know if she wants a condom for that specific body part. The areas are: Oral, Body, Anal, Vaginal.

As you can see in this example, the virgin state replaces the sex status, she never had sex before.

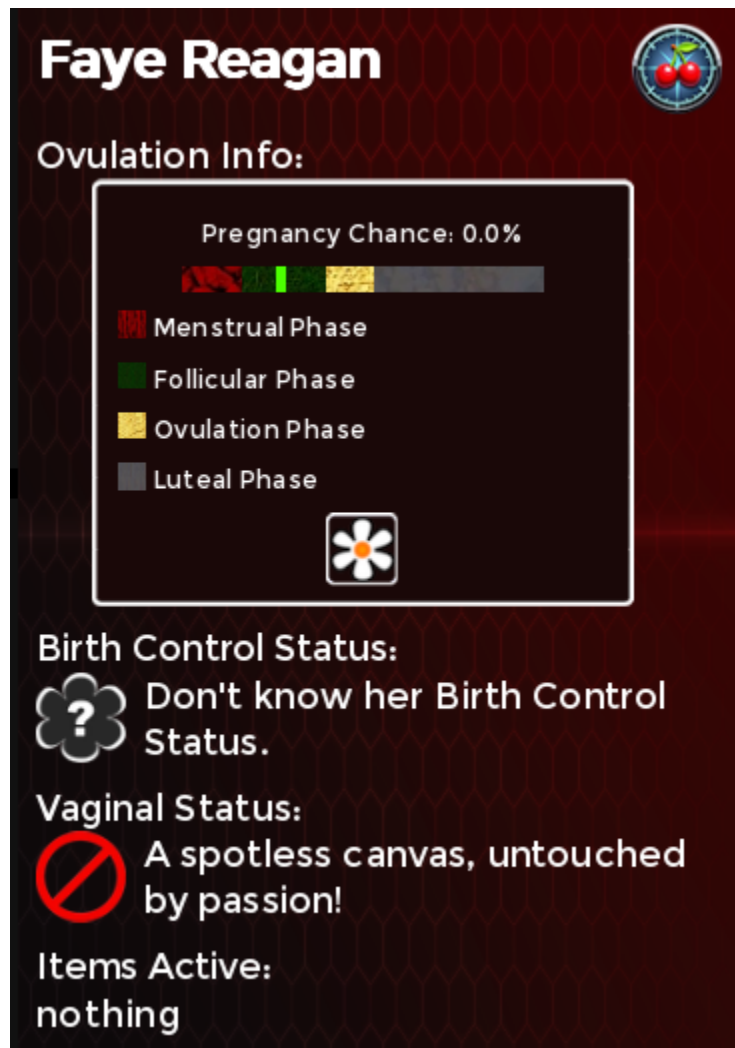

As for the Condom States:

	Unknown condom needs	? means you don't know if she wants a condom. The areas are: Oral,Body, Anal, Vaginal.
	Wants Condom	She wants you to always wear a condom - affects all sex, you will need to wear a condom if you want to use that body part.
	Likes it Raw	Doesn't care if you use a condom or not on that body part. Order: Oral, Body, Anal, Vaginal
	Recently Dirtied	Still dirty... I wonder why
	Fertility Booster Active	If you see this, it is because she took a fertility pill. You won't see the Prenatal one, as it is instant.

Clicking on the Cherry Radar Button

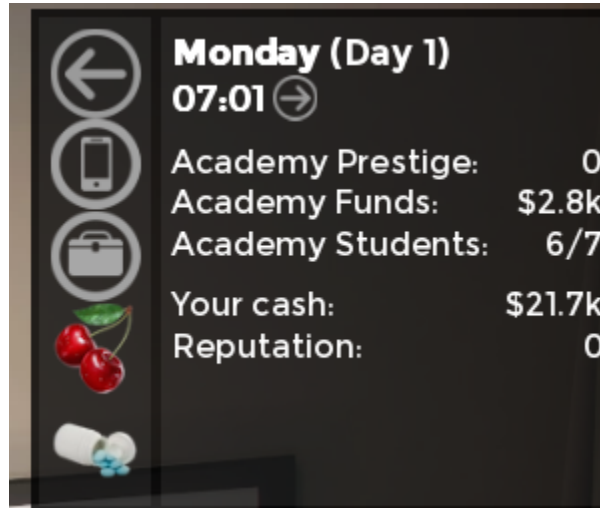

Clicking on the Cherry Radar Button will open up a more detailed screen:

There is a lot of information here, but the Cherry Window provides a quick snap shot of what is going on, whereas the Cherry Radar provides more info. This window will also provide the Ovulation stages, if she is pregnant the Ovulation stages are replaced with the pregnancy one.

The rest is pretty self explanatory.

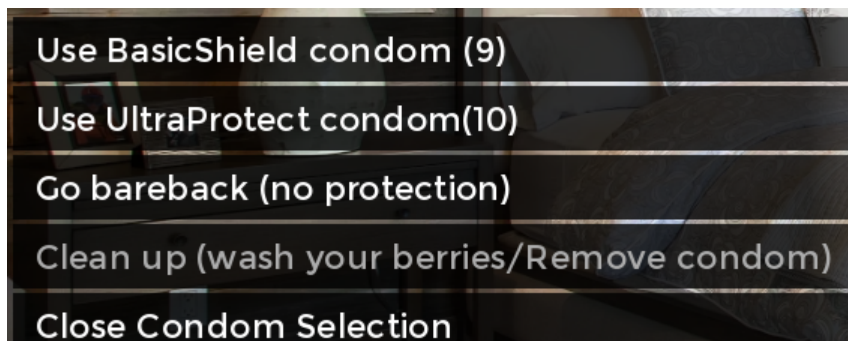

Cherry Icon everywhere else?

You will see a cherry icon in here, this is your cherry. Is it raw, covered, dirty?

	Raw Berries	Means your not wearing a condom, default state
	Viagra Status	If you see this, means your Viagra is still active
	Dirty Berries	You recently dirtied yourself, so wash up ya slob. More for visuals than anything.
	Wearing A Basic condom	Your berries are covered... basically.
	Wearing a Premium condom	Your berries are covered, no bullets getting through.

What happens when you click on the cherry icon? You get a menu:

Pretty simple to change your condom states any time! Only time you need to worry, is when you break one, or finish having sex.

Condom States

 	Working great!	Still working!
 	BROKE!	It is broken, and if you continue, could knock up a girl if she hasn't noticed.
 	BROKEN AND CREAMPIED	Means you came inside her while wearing a broken condom.
 	CAUGHT	Means you came INSIDE the Condom. You can still go for round 2.

What else?

Now that you know what your looking for... you can find it everywhere!

Common Questions?

I bought condoms, but I can't equip them!?

You need to 'consume' the item, which in turn gives you 10 condoms. Basically think of the item being a box, and you pull out a roll of 10 condoms.

MOD GIRLS

If you're a modder, or if you just need to figure out why the girl isn't showing up with a pregnant image in the world. Click on the computer in the office or home, then Input Code folder, type in iamdev, then go to 'Student Overview' and click on the girl's debug icon to view the screen.

It will tell you if there are preg fullbody images for it to find.

Rule of thumb: Image size to get a good clear result is height of 1500. I make all of mine 1600 height.

Pregnant Fullbody is pretty straight forward, the following tags are the only ones it will grab, if more tags are required, please let me know, as it is HARD CODED into the game:

Example: preg_3rd_shower.webp

NOTE: It will still grab a sluttier/whore version as per usual: preg_3rd_work_slut.webp, preg_3rd_work_slut1.webp, preg_3rd_work_whore.webp, preg_3rd_work_ultimate_whore.webp

Remember: That it should be in order, and you can have many versions for variety.

Example: preg_2nd_work.webp, preg_2nd_work1.webp, preg_2nd_work2.webp
